## Confidea Flushmount Delegate Interpretation & Voting Unit

### Description

The Confidea F-DIV is Televic's delegate panel for discussion systems, with an integrated speaker, simultaneous interpretation & electronic voting.

Its small form factor, housed in an elegant casing, permits a minimalistic integration into any meeting room furniture. The integrated speaker creates a distributed sound field in the meeting room, increasing intelligibility without the need for an additional room sound system.

The panel has a screw-lock connector to fit a removable microphone (available in 30, 40 or 50 cm versions). A 3.5 mm jack socket is available to connect headphones or a hearing loop for the hearing impaired. For simultaneous interpretation, the panel has a channel selector and headphones volume adjustment.

The information display shows the ISO code of the selected language and the volume setting. The voting systems includes 5 voting buttons and an RFID card reader for identification and authentication. The chairman version of this panel has additional controls (see Confidea F-CIV 71.98.0514).

### Benefits

The Confidea F-DIV is a sleek and discreet solution that is perfectly suited to conference rooms without an existing sound system. The ability to connect headphones provides accessibility for the hearing impaired. The clear and easy channel selector allows for user-friendly simultaneous interpretation conferences. The range of 5 voting buttons allows for easy and detailed voting options.

The unit is available in a variety of custom colors, sizes and finishes to blend in neatly in any environment. The Confidea F-DIV is backed by the Plixus® network and redundant cabling to ensure maximum reliability. Finally, its shielded microphone is immune to mobile phone interference.
