

NEW Plixus AE-R

**The slim and standalone core
of your conference**

televic
conference

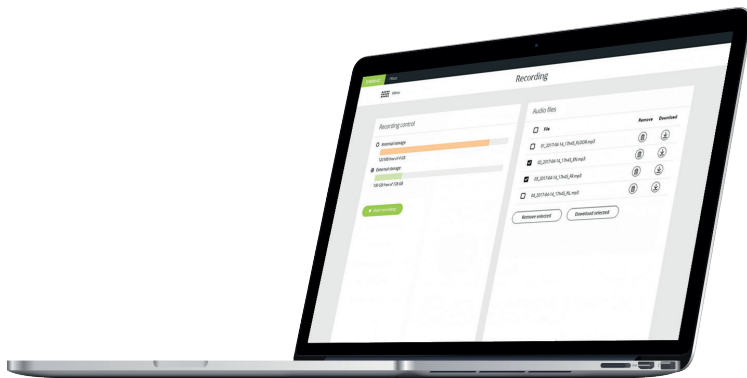

A compact cornerstone

The Plixus AE-R is a compact central engine with **all functionality on board to run a conference, but without the need of a dedicated computer**. From microphone management over interpretation channels and audio routing to camera control: the Plixus AE-R is ready for action. With an integrated hard drive, an expandable USB slot, and a recording button at the front, recording meetings becomes a breeze, even multilingual ones.

From simple to advanced meetings

Whether your meeting only requires basic functionality or whether you need complex features, Plixus AE-R is a versatile partner. An easy to use **web server gives you full access to core meeting functionality**. If you need advanced tools, **Plixus AE-R works with the full suite of CoCon applications** to make even the most demanding meetings a success. What's more, Plixus AE-R also **works seamlessly with software solutions** such as Congressify and TCouncil.

Plixus™ Powered

Since the Plixus AE-R is powered by the Plixus network, you enjoy all benefits of the most versatile conference network technology around. Easily **combine wired and wireless units** to extend the range of your network or to split or combine rooms.

Plixus AE-R gives you the flexibility to run and record multichannel meetings, no matter the size or scale.
