The first INTERPRETER DESK designed **BY** and **FOR** INTERPRETERS

Televic's Interpreter Desk is a demonstration of user centered design. It embodies a new approach to enhance the working comfort of the interpreter. The unique focus on superior user feedback, improved ergonomics and intuitive interfacing makes it the most user-friendly professional interpreter desk on the market today.

The Televic Interpreter Desk has been designed by and for the professional interpreter.

Designed to take a minimum amount of space on the table, the Televic Interpreter Desk optimizes the limited space that is available in the typically packed interpreter booths. Hardware and software blend together and create a seamless experience for the interpreter.

The design of the Televic Interpreter Desk is clear and minimalistic, innovative yet familiar and complying with the strict ISO standard for interpreter equipment. It helps freelance, residential and visually impaired interpreters to do their job better, more focused and yet more relaxed.

- 1 Color display for control and information
- 2 Push-to-select jog wheel
- 3 Braille indicators
- 4 6 Relay buttons
- 5 A/B/C channel selection
- 6 Large microphone button
- 7 Back-firing speaker
- 8 Rotational controls for headphones volume, speaker volume, bass and treble

Feeling in control

Visually impaired interpreters were instrumental in assisting Televic with the design of its new interpreter desk.

Thanks to their input on how design could make their work easier, the Televic Interpreter Desk has **braille indications** near the buttons, **tactile references** to guide the interpreter to the right functions and **audible feedback** when using the desk.

Ergonomic design

The angle of the desk's faceplate has been optimized for an **optimal viewing angle** and a **relaxing hand position** while using the controls. This ergonomic design allows using the interpreter desk comfortably, even during long meetings.

Remote interpretation ready

What if you could deliver **HD video, lip-sync'd** to the interpreters without extra video distribution amplifiers and without extra cables?

Up until now, delivering High Definition video to remote interpreter booths was a cumbersome and expensive process.

Thanks to the Plixus® network technology and **HDMI output** on the interpreter desk, adding a screen for the interpreters is easy and cost-effective.

A perfect solution for interpreter booths that are located away from the conference room and where interpreters lack visual contact with the speaker.

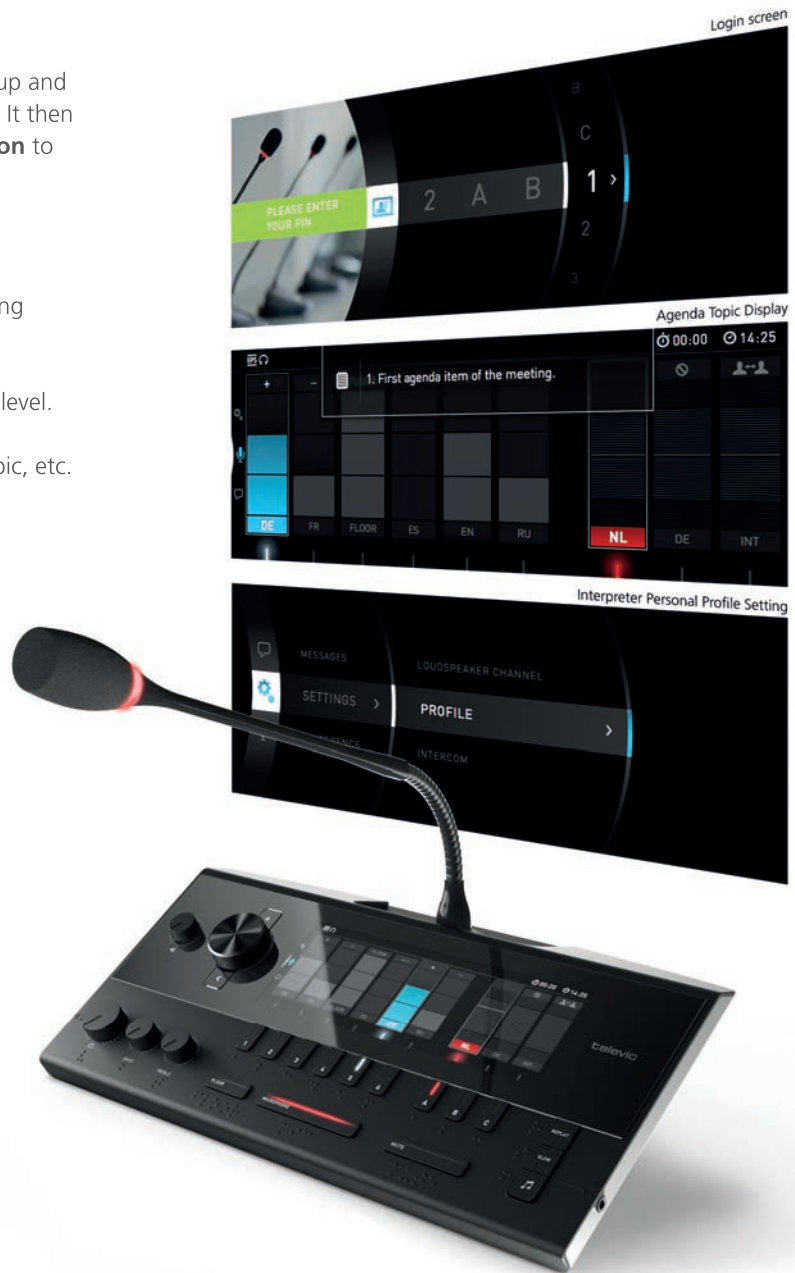

On-screen user interface

The on-screen user interface is used for set-up and adjusting the desk to the interpreter's liking. It then provides valuable **feedback and information** to the interpreter while he or she is on the job.

Important functionality includes:

- Visual feedback of selected relay, outgoing channel, muted incoming and outgoing channels, floor channel.
- A visual representation of interpretation level.
- Visual indication of sound level.
- Overlay of messages, current agenda topic, etc.
- Home button to instantly display the main conference interpreting screen.

Feature-rich innovation

- Ergonomic design with split use/control zone.
- Tactile and acoustic feedback for visually impaired interpreters.
- Hearing Protection Technology (Patent Pending).
- Intuitive layout of controls.
- Small footprint with back-firing loudspeaker.
- Color screen with intuitive display of information and settings.
- HDMI connection for displaying a close-up view on the speaker in High Definition and lip-synchronized.
- 6 relays and A/B/C channel selection.

Plixus® Powered

This Televic product is Plixus® Powered. It takes full advantage of the **Plixus Conference Network Technology**: an innovative, future-proof technology developed by Televic offering high performance, security and redundancy in mission-critical conference applications.

- 1 Plixus Multimedia Engine
- 2 Plixus Network Extender
- 3 Televic Interpreter Desk
- 4 Plixus Network
- 5 HDMI connection
- 6 HD Monitor
- 7 Delegate Conference Equipment
- 8 PTZ camera's
- 9 Video source
- 10 Video switcher

Recommended accessories

The Televic TEL15 Headphones and HS15 Headset have been developed specifically for professional conference interpreters. Optimized for **perfect wearing comfort**, **easy cleaning** and **excellent sound reproduction**, they are an ideal supplement to the new Televic Interpreter desk.

TEL15 Headphones

for Professional Conference Interpreters

- Wide frequency range
- Ultra lightweight
- Wide adjustment range
- Soft TPE headband
- Easy to sanitize

HS15 Headset

for Professional Conference Interpreters

- Wide frequency range
- Ultra lightweight
- Wide adjustment range
- Soft TPE headband
- Easy to sanitize
- Omni directional condenser mic
- Excellent sound quality
- Single 3.5 mm jack
