

# Product Discontinuation Letter

4 June 2024

Dear valued partner,

This letter serves as a formal notification that Televic Conference will phase out the sales of its products with the screw lock microphone connector as a standard product, starting from September 2024.

Televic Conference acknowledges the obligation to promptly inform our customers of the intent to exit products to enable our customers to prepare for alternatives and/or to assist in their product portfolio renewal process. In that respect, all current products with screw lock microphone connector will be replaced by the same product with the new “Mike” push lock microphone connector.

While we regret any inconvenience this announcement may cause, we are eager to supply your future product requirements with corresponding products :

| Reference  | Description    |
|------------|----------------|

| 71.98.0535      | Confidea F-DM Mike      |
| 71.98.0545      | Confidea F-CM Mike      |

All existing D-MIC SL microphones will however remain available on the price list, as these will be still used for the D-Cerno products.

All mentioned current Plixus products with the D-MIC SL microphone connector will remain available until the end of 2024 at the currently applicable pricing, to limit the impact on ongoing projects. As of January 2025 those will be considered as a custom product however.

To serve you best, all inquiries and requests should be directed through the normal sales channels or you can contact the Televic Conference headquarters: [conference@televic.com](mailto:conference@televic.com)

  
 Sincerely,  
 Karel Vanheule  
 Product Manager
